

Client Project Program

Program Information

ABOUT THE PROGRAM

OVERVIEW

WeCloudData's Client Project Program is a one-of-a-kind career service program for you to gain professional experience through our real client projects and prepare for data careers.

WHO IS IT FOR?

If you have a degree in Data Science or AI, but lack industry experience

If you have learned DS/AI skills online, from a bootcamp, or from certificate programs, but still cannot land a job

If you are a data professional, who is seeking for promotions to a senior-level role

You should not miss WeCloudData's Client Project program. This program is exactly what you are looking for. Your degrees/certificates/online courses do not give you enough experiences and soft skills to get a data job. Let us help you gain real-world experience through our unique trainee program and succeed in your career transition with our one-on-one mentorship career service.

PROGRAM DETAILS

REAL CLIENT PROJECT

You can only gain soft skills from real work experience, which play no lesser role than hard skills in a successful data scientist career, for example translating business problems into analytics, machine learning, or AI questions, reporting, project management, time management, communicating analytics results to non-tech colleagues and shareholders.

Past real clients

Our real client projects allow you to work with a real client directly as a data science consultant. You will be briefed by a real client with an issue they are looking to solve. You will be led by project managers to leverage the data science or data engineering skills you learned, you will help the clients solve the problem, and present to them.

SAMSUNG

TOROMONT

COMMUNITTECH

They asked me to talk about my experience with data. When I started talking about my portfolio projects, they told me to stop and said they were interested to know about live projects I have done for clients.

- WeCloudData Alumni

PROJECT MANAGEMENT TRAINING

- Client project requirements handbook
- Project management 101
- JIRA/Confluence training

Project Management Requirements Handbook [Client Projects]

BeamData Ltd

SAMPLE PROJECTS

CAREER SERVICES

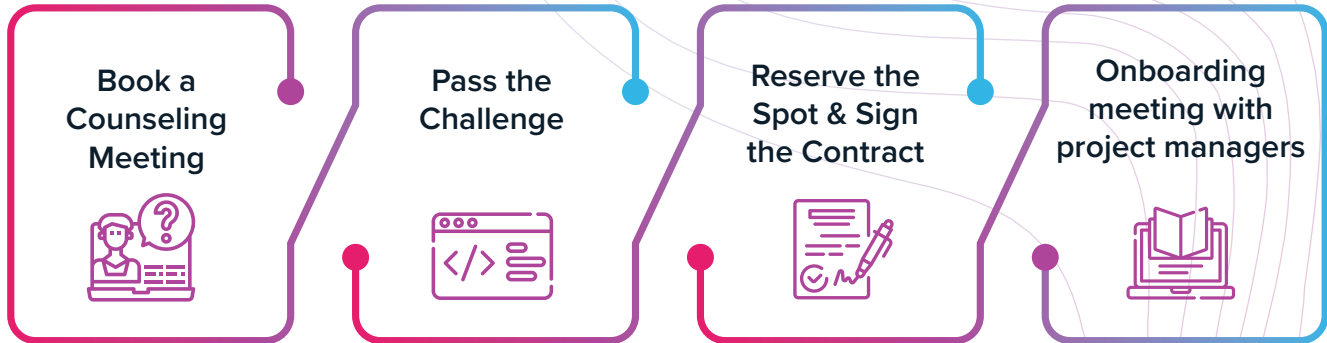

You will receive dedicated support from career serves throughout the program:

- One-on-one counseling to set your career goal, assist your job search, and track your progress
- Building a resume and professional data portfolio to demonstrate your skills and robust professional experience (Portfolio samples)
- Professional communication coaching to prepare for your behavioral interviews (Mark Caven)
- One-on-one mock interviews on take

home assignments, whiteboarding and technical challenges to set you apart in technical interviews.

- Building up your industry network through guest seminars, hiring panel discussions, hiring partner demo workshop (CIBC, Tim Hortons, Loyalty One, Bell Canada)
- Professional profile pictures shooting by commercial photographer, and polish your online professional brand with blogs and LinkedIn
- Alumni referral network, data science community

ADMISSION PROCESS

Our program advisor will have a 1-on-1 meeting with you to see if the program is a good fit for you. There is no application fee. It takes about 30 minutes.

There will be a technical challenge and an interview. In this data challenge, you will be tested on the following skills: Python, SQL, Data Exploration, Machine Learning

Our admission officer will work with you directly to help you fill out a contract and process your payment.

According to your interests and results from the challenge, your project manager will assign you to a project that suits you the best.
